

It is a Polish company that has been operating since 2011. The dominant activity is medical and rehabilitation services, which are provided in two stationary facilities in the capital of Poland - Warsaw.

Polish
Health
Centers

CORPOMED in cooperation with the Polish Health Centers (PHC) also deals with the organization of rehabilitation and slimming tourism.

We offer rehabilitation stays (30, 60 or 90 days) for children and adult patients from the Persian Gulf.

The stay and classes take place in well-prepared and selected rehabilitation centers in Poland, ensuring the highest quality of rehabilitation in various neurological and orthopedic diseases, including cerebral palsy, after strokes and brain injuries, after orthopedic surgeries and injuries.

We deal with the organization of stays in the full scope, starting from the verification and analysis of the patient's medical documentation, the selection of a dedicated center, by assisting in the organization of flights and transfers, supervision over the course of rehabilitation until the patient's happy return to their homeland.

We encourage you to familiarize yourself with our offer and use our services.

CORPOMED

REHABILITATION

ADULTS

CHILDREN

Our rehabilitation and recreation centres specialise in the **rehabilitation of musculo-skeletal system diseases** (also for people on wheelchairs), spinal pains and pains in peripheral joints. In order to choose the most appropriate type of treatment and thus the most effective therapy, we **provide individual consultations with medical rehabilitation physician**. The proper choice of treatments depends, among others, on the type of disease, current medical condition and age of the patient, concomitant diseases and suffered diseases, medications taken and duration of disease. In our center we provide care to patients with the following diseases: patients after coma

- SM
- cerebral stroke
- spinal injuries
- craniocerebral trauma
- MPD
- meningo-spinal hernia
- oncological diseases
- status post sprains and dislocations of joints
- status post bone fracture
- status post muscle injury
- status post joint prosthetics
- osteoarthritis
- spinal pain syndrome, e.g. lumbago (low back pain)
- discopathy, including complications caused by brachialgia and sciatica
- RA (rheumatoid arthritis)

Our team consists of therapists specializing in many **methods of rehabilitation**, among others, individual kinesiotherapy, also with the use of PNF method, the elements of Vojta's method and NDT-Bobath method, kinesiotherapy with the use of Teratogs and a robot for teaching to walk (reoambulator), hand therapy, sensory integration, occupational therapy and logotherapy. Moreover, during your stay in our Centre, we offer you the option of psychological support, both in individual or/and group form. The rehabilitation programme is, depending on the needs and the type of dysfunction, **individually adapted to each child**, following medical and physiotherapeutic consultation.

The children's package includes:

- patients after coma
- physician's consultation
- physiotherapeutic consultation
- nursing care
- kinesiotherapy
- occupational therapy
- hand therapy
- speech therapy
- sensory integration
- craniosacral therapy
- psychotherapy
- walk therapy using a walk robot and walk therapy (reoambulatory) minimum 1 x during the package (subject to availability and medical indications)
- Veronica Sherborne's Method
